

Fumigation Free Pallet Equipment

Senyu as a professional high quality Fumigation Free Pallet Equipment manufacturer, you can rest assured to buy Fumigation Free Pallet Equipment from our factory and we will offer you the best after-sale service and timely delivery. We design and produce the Fumigation Free Pallet Equipment for more than 6 years. The press wood pallet is a good alternative for the traditional wood pallet, it can save your budget, stock space and shipping cost by choosing the. When you have regular demand of the pallet, it is better to install the Fumigation Free Pallet Equipment,

and produce the press wood pallet locally, it will greatly reduce the cost by mass production locally. Most of our products are export to European, American, Asian countries and we look for long term partners in all countries in all areas.

Product Introduction

Hot Selling Low Price Fumigation Free Pallet Equipment. Senyu is a Fumigation Free Pallet Equipment manufacturer and supplier in China. Our target should be to consolidate and enhance the high quality and service of existing goods, meanwhile frequently develop new products and solutions to fulfill distinct customers' demands for Europe style for China Industry Fried Boiled Instant Noodle Processing Making Equipment, For even further queries or should you have got any question regarding our products and solutions, make sure you will not be reluctant to contact us. Europe style for China Instant Noodle Equipment, Fried Noodle Making Equipment, With the first-class products and solutions, excellent service, fast delivery and the best price, we have now won highly praise foreign customers'. Our products have been exported to Africa, the Middle East, Southeast Asia and other regions.

Fumigation Free Pallet Equipment Factory, Suppliers, and Manufacturers

Product Introduction of Fumigation Free Pallet Equipment

The Fumigation Free Pallet Equipment, includes wood chipping machine molding press machine, crushers, dryers, glue mixers, storage bins, etc. The production line has been designed by our company for many years of production experience, with good stability, high production efficiency, low energy consumption, and flexibility. It is convenient to change the press molds, can produce various specifications of pallets, easy to install, does not require basic positioning. This machine

has a reasonable design and structure. And we can send our worker to install or provide video instruction on how to install it. And good after sales service, we also produce the press wood pallet, so we can solve any possible problems during production.

Advantage of Fumigation Free Pallet Equipment

Our company focuses on the production of Fumigation Free Pallet Equipment, and launches of a molding machine with superior performance and extra-large pressure design, producing molded pallets with better strength, which are loved by customers at home and abroad.

- (1) Higher pressure: the actual working pressure reaches 1000T.
- (2) Can improve product quality: better pallet strength and relatively smoother surface.
- (3) Large size: the maximum processable size is 1300×1200mm.
- (4) Good stability, super high-cost performance.

3. Qualification of Fumigation Free Pallet Equipment

Qingdao SenYu(Scenix) is located in the beautiful city of Qingdao, China, specialized in the R&D, sales and manufacturing of Fumigation Free Pallet Equipment. Through years of strenuous effort, we have started to play an important role in this market. We have 3 modern workshops and production line, with patent technology to make the stable Fumigation Free Pallet Equipment with an annual output of 5000,000pcs.

With the competitive prices, quality products and aftersales services, our Fumigation Free Pallet Equipment has been used in many fields of chemical, auto-parts, printing, food etc. Most of our customers are repeat order reputable customers from Middle East, Asia, Europe and other foreign countries.

Faq

Q: Are you trading company or manufacturer?

A: We are professional manufacturer of the Fumigation Free Pallet Equipment and production line. And Welcome to visit our factory

Q: How long is your delivery time?

A: It take about 45 working days to finish a whole set of the Fumigation Free Pallet Equipment

Q: Do you provide samples? is it free?

A: Yes, we could offer the sample of the pallet for free, clients only need to pay the freight.

Q: What is your terms of payment?

A: T/T or L/C

Q: How many sizes available can Fumigation Free Pallet Equipment produce?

A: We have seven size mold and has some customized molds

Q: Can you do the OEM Size and pattern for Fumigation Free Pallet Equipment

A: Yes, with certain quantity, we can make the new mold and produce any size and pattern.

Q: Can we order mixed size of the pallet

A: Yes, we have all sizes in stock and you can have mixed order.

Q: How many pallets can be loaded in one container

A: Because of the nestable design, 1000-1500 pcs Sawdust Wood Pallet can be loaded. And it takes about 3 contains to load the machine.

5. How to use Fumigation Free Pallet Equipment to produce the pallet

First the wasted wood was put into the chipping machine and chip it to fine wood chips. The fine wood chips are dried by a dryer, then mixed with thermosetting resin, and placed in a press for compression molding. The entire production process is carried out under high temperature and high pressure to kill any insects and fungi remaining in the wood. At the same time, due to the high density of the wood products produced, it can prevent any other insects from reproducing and re-invading. This kind of molded product is "artificial wooden packaging material" instead of the traditional "solid wood packaging material". Its products no longer need to be treated with insects, and there are no live insects in the products. It meets ISPM15 (International Standard for Phytosanitary Measures 15). The demand for exporting wood packaging products, and after various service life cycle fatigue tests, can be shipped with the goods to other countries without any special treatment.

Attentions on stock and use of the Fumigation Free Pallet Equipment

1. Materials containing wood fiber refer to bagasse, bamboo, waste wood, short wood, straw, etc.
2. Anything containing wood fiber can be used as a raw material. Therefore, a wide range of raw material sources saves the manufacturing cost of the product to a large extent.
3. In order to ensure that the raw materials and glue are evenly mixed, the moisture content of the dried raw materials should be maintained at 5%
4. The adhesive mentioned above is phenolic glue or other glues.

5. In actual use, the measurement of tray performance depends on static load and dynamic load load
